

Flushing Recommendations for Legionella Control

Routine flushing of your water lines won't solve your Legionella problems but flushing can have positive effects by eliminating stagnant water.

1

Remove and Clean Aerators

2

Run Hot Water for 10 minutes

3

Repeat for Cold Water

4

Repeat 3 times per week for 2-4 weeks

5

Retest your water

6

Consider a Water Management Plan
to Ensure Long Term Water Health
